Claim 21 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 21 states that "the axial stop" is formed by a spacer sleeve (element 9 in the drawings). However, parent claim 18 recites that "the axial stop" is arranged on the peripheral shoulder of the elastomeric ring (element 19 in the drawings). Since spacer sleeve 9 is not arranged on the peripheral shoulder of the elastomeric ring, claim 21 contradicts claim 18 thus rendering the claim vague and indefinite.

Claims 1-20 and 22-34 are allowed.
